Mudrika Sharma

Full Stack Developer

+91-7021778257 mudrikasharma2009@gmail.com mudrikasharma mudrika20

Summary

Computer Science sophomore with a solid understanding of the MERN stack (MongoDB, Express, React, Node.js) and Data Structures Algorithms. Experienced in building academic and personal full-stack projects, implementing REST APIs, and solving algorithmic problems. Actively improving problem-solving and development skills and seeking opportunities to learn and grow as a software developer.

Skills

Programming: ReactJs, C, C++, Java, Python, Javascript, NodeJs, ExpressJS, MongoDB, SQL
Tools: POSTMAN, GIT, CI-CD Pipeline

Projects

AEZ NT LEARNER'S **April 2026 – Jul 2026**
Software Development Intern *Remote*

- Engineered an AI-powered document processing platform using **React.js, Node.js, Express.js, MongoDB, and Python** to automate extraction of structured data from academic PDFs.
- Designed frontend and asynchronous processing pipelines for PDF ingestion, metadata extraction, and question-paper/marking-scheme pairing using AI models.
- Implemented canonical question normalization, automated validation, and database indexing to improve extraction accuracy and ensure reliable document matching.
- Optimized application performance through concurrent processing, debugging, and QA automation, improving scalability and reducing redundant processing.

Grocery Cart Application **Nov 2025 – Dec 2025**
Personal Project

- Built a full-stack CRUD-based grocery cart application using React for the frontend and Node.js + ExpressJS for RESTful APIs, supporting real-time add, update, delete, and fetch operations.
- Implemented backend business logic and validations, including automatic item name capitalization, default values handling, cart statistics computation (total, purchased, pending), and conditional deletion when item quantity reaches zero.
- Designed an interactive and responsive UI with filtering (all/purchased/pending), instant UI updates after API actions, and rule-based messaging to enhance user experience.

Tic-Tac-Toe **Nov 2025 – Dec 2025**
Personal Project

- Developed an interactive Tic-Tac-Toe game using React, implementing game state management, win detection logic, and reset functionality.
- Focused on component-based UI design and efficient state updates for smooth user interaction.
- Deployed the application on GitHub Pages, gaining hands-on experience with build and deployment workflows.

Education

Heritage Institute Of Technology, Kolkata **2024 – 2028**
BTech. Computer Science(Data Science) *YGPA: 8.19*

Higher Secondary, ISC **2023 – 2024**
Agrasain Balika Siksha Sadan, Howrah *Percentage: 91*

Senior Secondary, ICSE **2021 – 2022**
Agrasain Balika Siksha Sadan, Howrah *Percentage: 94*

Certifications

- HackerRank Certificate– 2026: Passed and granted certificates for Programming Languages: Python(Basic), ReactJs(Basic), Problem Solving(Basic), SQL(Basic), Frontend Developer(ReactJs)
